

Portfolio

A personal portfolio site that showcases my skills,
projects, and experience

Your Name · @Yarzarmyomin97

#built-with-claude

#vibecode.tours

What it is

- The problem it solves: Generic resumes and look-alike portfolios make it hard for developers to stand out during job hunting — recruiters skim in seconds, not minutes.
- Who it's for: Me — a Flutter Developer, job hunting and needing one place that shows real projects and skills, not just a static resume.
- The one thing it does well: Makes a strong first impression fast — modern glassmorphism design + clear project showcase that gets recruiters to actually stop and look.

How it works

```
# the core flow in 3 commands  
npm install  
npm run dev  
# open http://localhost:3000
```

Stack: **Next.js, React, TypeScript, Tailwind CSS, Framer Motion** · built with Claude Code
